

**128 kW**

PROJECT SIZE

Des Moines, IA

LOCATION

165,900 kWh

ANNUAL PRODUCTION

2,695 t CO₂

EMISSION REDUCTION

DRAKE UNIVERSITY

ENHANCING ON-CAMPUS SUSTAINABILITY

Drake's mission is to provide an exceptional learning environment that prepares students for meaningful personal lives, professional accomplishments, and responsible global citizenship.

In 2019 the University completed a 128 kW solar installation at the Roger Knapp Tennis Center.

The carbon emission reductions from the project helped Drake met the President's Climate Commitment goal of a 25% reduction of greenhouse gasses, and also helped the university to earn a STARS Bronze rating for sustainability.

Drake University is planning to expand on-campus solar generation in 2021.
